PROFESSIONAL SUMMARY

Full-stack software engineer with 6+ years of experience specialising in web performance engineering and scalable application architecture. Proven track record optimising Core Web Vitals, implementing Zero-Copy rendering pipelines (SharedArrayBuffer), and resolving Cross-Origin Isolation conflicts in high-complexity WebGL + Web3 environments. Led 10+ client projects from concept to production and mentored 80+ developers.

TECHNICAL SKILLS

Performance & Frontend: Core Web Vitals, WebGL, SharedArrayBuffer, COEP/CORP headers, React.js (Next.js), TypeScript, TailwindCSS

Backend & API: Node.js (Express.js, Nest.js), PHP (Laravel), Python (FastAPI), RESTful API, AWS Lambda, n8n

Blockchain/Web3: Ethereum, ethers.js, Web3.js, IPFS, MetaMask, EIP-1193, ERC-1155, Solidity

DevOps & Tooling: AWS, Git, OpenAPI Spec, Mintlify, Docusaurus, Claude Code, GitHub Copilot

Database: PostgreSQL, MySQL, Redis, MongoDB

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Engineer | [Upwork Top-rated](#) | Jan 2025 – Present

- Architected a Persistent Stateful Worker system for a WebGL/Physics dashboard managing ~7,000 entities, eliminating JSON serialisation overhead via SharedArrayBuffer (Zero-Copy) and reducing render latency by ~100ms.
- Resolved Cross-Origin Isolation conflicts between WebGL high-performance mode and Web3 wallet providers (Phantom, Brave) by implementing COEP: credentialless in HTTPS environments — a Senior/Lead-level architecture solution.
- Engineered domain-wide Cookie strategy with gated 'Resume Session' flow to maintain EIP-1193-compliant wallet synchronisation across subdomains from landing page to dashboard.
- Built an AWS-based smart contract audit lab (Node.js + Solidity analysis tools), increasing audit throughput to 20 contracts per week and significantly improving security assessment capabilities.
- Developed an AI-powered image generator (OpenAI API, Gemini, PHP) as a custom Elementor shortcode, saving the client 10 hours per week via seamless text-to-image automation.
- Led API documentation migration to Mintlify, cutting developer onboarding time from 3 days to 1.5 days (50% improvement).

Software Developer | [Pena](#) | Mar 2023 – Dec 2024

- Refactored company website using React.js and modern JavaScript standards, improving Lighthouse Accessibility score from 89 to 97 and SEO score from 95 to 100.
- Engineered advanced scraping strategies (PHP/Node.js), capturing 1,000+ data points daily, automating 2 hours of manual work for the [MrScraper](#) project.
- Optimised data processing workflows with AWS Lambda and AI agents, increasing speed by 7% and improving data accuracy from 90% to 95%.
- Led 10 diverse client projects (NFT gaming to property tech) from concept to launch with seamless API integration.

Software Developer | [Artopologi \(RWID\)](#) | Jan 2022 – Mar 2023

- Drove 20% daily user growth by leading core Web3 integration (React.js, ethers.js, MetaMask), enabling mint, transfer, and listing of artwork on the Ethereum blockchain.
- Reduced operational costs by 5–7% by building a Node.js API for blockchain transaction history, supporting 50+ artist users.
- Advised on blockchain architecture: IPFS storage, MetaMask wallet integration, and Web3.js implementation.

Frontend Facilitator | [Binar Academy](#) | Aug 2020 – Aug 2022

- Mentored 58 front-end developers, achieving an 85% placement rate as ReactJS specialists in the IT industry.
- Selected as Industry Mentor for Kampus Merdeka 2022, leading 25 students to an 80% graduation rate in Frontend ReactJS.

Blockchain Developer | **iGrowChain** | Mar 2019 – Jul 2020

- Led development of an Ethereum-based blockchain system, reducing intermediaries by 20%.
- Contributed to the tech stack that secured a P2P lending license in Indonesia.

KEY PROJECTS

- **ChainX** — Smart contract security scanner (Node.js, OpenAI API, Perplexity API). Static analysis + AI agents. [chainx.id](#)
- **Arto NFT Members** — ERC-1155 Loyalty & Rewards System (Solidity, React.js) with scalable multi-tier membership and batch reward distribution. [memberships-nft.vercel.app](#)
- **Jan AI Contributions** — 113 commits to [janhq/jan](#): Tailwind CSS UI, quickstart guides, Scalar API docs integration.

EDUCATION

B.Sc. Computer Science / Information Technology Education — Universitas Negeri Surabaya, 2017 | GPA: 3.36/4.00

LANGUAGES

English (Full Professional Proficiency) | Indonesian (Native) | Javanese (Native)
